**SEEC ADDS 76 SOA COMPONENTS TO NEXT GENERATION OF
SEEC ADVANTAGE LIBRARY™; SEEC CUSTOMER PRESENTS TANGIBLE
BENEFITS AT ACORD LOMA**

Business Component Software Leader Continues to Expand Library of ACORD-standard Reusable Components and Gain Adoption with Life/Annuities and P&C Carriers

Las Vegas, NV and Pittsburgh, PA – May 22, 2006 – SEEC, Inc. (OTC: SEEC), the leading provider of Business Component Software for the insurance and financial services industry, today announced a significant update to the SEEC Advantage Library™ at the ACORD LOMA Insurance Systems Forum in Las Vegas. The SEEC Advantage Library is the largest compilation of non-proprietary, reusable business software components ever offered to the insurance and financial services industry. The newest generation of the Library includes the addition of 76 business components for Property and Casualty and Life and Annuities insurance, and significant design enhancements that further improve the flexibility for customizing and changing the components.

SEEC is gaining widespread adoption of its technology, with customers using its components to rapidly define and assemble customized service-oriented applications (SOBA's) to address specific process needs and enhance sales and service capabilities. One SEEC customer, a major Life/Annuities carrier, will be presenting at ACORD LOMA how they are using business components to deliver agent self-service capabilities. For details on the presentation, visit the SEEC website (http://www.seec.com/pages/q24_events.jsp) or ACORD LOMA (<http://www.acordlomaforum.org/2006/sessions.aspx>).

“Now that the SOA market is maturing, the center of the action is moving away from the nuts and bolts of the infrastructure and toward the specific Service requirements of the business. In other words, once you build the roads, then you need the cars and knowledge to drive them,” said Jason Bloomberg, Senior Analyst at ZapThink. “SEEC is pioneering this shift in focus with out-of-the-box process functionality essential to helping insurance carriers gain a competitive advantage. The big win that companies can expect is in enabling more agile business processes that drive business value in the face of ongoing change.”

The SEEC Advantage Library includes components for automating and integrating specific insurance and financial services- related processes across delivery channels, products and back-end systems. All components meet ACORD standards and can be deployed component-by-component in a planned, measured approach. The essential features of the next generation of the Advantage Library include:

- 22 new components for Life and Annuities
- 54 new components for Property and Casualty
- Property and Casualty business components are now available for 8 personal and commercial lines including:
 - Personal: Auto, homeowners, marine and umbrella
 - Commercial: Auto, worker’s compensation, business owner’s policy (BOP) and liability
- Pluggable Client Interface supports rapid delivery using a customer’s existing web user-interface, or an out-of-the-box SEEC user interface leveraging portals, JSP or JSF technology.
- Business Rule Framework separates customized business logic from base component functionality
 - Customers can rapidly add and change custom rules without coding
 - Base components can be upgraded without affecting previous business rule customizations

“The next generation of the Advantage Library represents the high level of commitment SEEC maintains in addressing a broad range of needs for carriers in Life/Annuities and Property & Casualty lines,” said Shane Tulloch, CEO of SEEC. “The Advantage Library delivers unmatched flexibility to deliver new business capabilities that solve problems

faster, more effectively, and at a lower cost point than proprietary software packages. SEEC will continue to enhance the Advantage Library and expand the range of industry-specific processes it supports.”

About SEEC

SEEC provides service-oriented business applications using the SEEC Advantage Library™, the world's largest collection of standards-based, reusable software components for the insurance and financial services industries. The SEEC Advantage Library is the foundation for a truly customer-centric approach, offering companies the freedom to choose only the software functionality they want, license the source code, customize and deploy in less than 90 days, and then reuse across any channel, any product, anywhere in the business. At a price that is a small fraction of the cost of a proprietary solution, it's the agility, speed and cost savings to create strategic business advantage from IT.

Designed specifically for insurance and financial services, SEEC's service-oriented applications deliver process-rich sales and service capabilities that empower agents, producers, and service staff to work faster and sell smarter across all channels, products, and lines of business. Industry leaders like New York Life Insurance, Banker's Life & Casualty, North Carolina Farm Bureau Insurance, and Ohio Casualty rely on SEEC to streamline service delivery, enhance customer relationships, and drive innovation and growth.

SEEC customers include Global 1000 companies from North America, Europe and Asia in insurance, banking, financial services, healthcare, and a range of other service-driven industries. The company is headquartered in Pittsburgh, Pennsylvania, and has offices in Hyderabad, India.
