FOR IMMEDIATE RELEASE

OneShield Unveils Dragon Intelligence at ACORD/LOMA
*New Analytics Component from Leading Policy Management Solution Provider Provides
Uniform View for All Stakeholders*

Las Vegas, Nevada – May 24, 2010 – [OneShield, Inc.](#) the developer of [OneShield Dragon](#)®(Dragon), an innovatively modern, rules- and tools-based, data-driven policy management solution, today announced the release of Dragon Intelligence (DI) analytic reporting at the ACORD/LOMA Insurance System Forum.

Property and casualty (P&C) carriers are realizing the power of understanding performance levels and trends in their key business units including realizing benefits such as greater insight into customer behavior, financial performance, and underwriting profitability. Dragon Intelligence takes into account a carriers' specific business models to analyze specific key risk underwriting benchmarks as well as workflow job functions while interweaving external data sources to provide comprehensive, multi-disciplinary view of the complete insurance enterprise.

"DI offers every functional area such as agency management, channel marketing, underwriting and operations, a complete decision support system that provides insight into both the top and the bottom line," said Steve Forte, industry principal for OneShield. "As a carrier's book of business changes DI provides a hard, fast, real-time look at the book so you can set or adjust benchmarks based on the true appetite for risk."

Dragon's modular, service oriented architecture (SOA) enables DI to integrate with other reporting and analytic products such that content from both systems can coexist and interact with a bi-directional data flow.

"Given the economic malaise and soft market we are currently faced with, P&C insurers need real time insight into their operations in order to proactively react to changing market and business conditions. Having a granular view of key performance indicators will differentiate the leaders and followers," Forte concluded.
